

Empathy Map

Date	23 June 2026
Team ID	SWTID-2026-1377
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I understand this topic, I just can't explain it clearly." • "I keep forgetting whether I actually learned this or just memorized it for the test." • "I don't know which part of my answer is wrong until the teacher points it out."	THINKS • "Am I actually learning this, or just recognizing the right answer when I see it?" • "What if I sound confident in the interview but I'm actually wrong about something?" • "I don't have a teacher or mentor available right now to check my understanding."
SINDHUR A DEVI (team lead)	
DOES • Re-reads notes and textbooks repeatedly without testing actual understanding • Explains concepts out loud to themselves or a friend, but gets no structured feedback • Relies on MCQ practice tests that only check recall, not explanation ability	FEELS • Anxious about being asked to explain a concept live in an interview or viva. • Frustrated by not knowing what they don't know • Isolated when studying alone, without immediate feedback
