

Project Executable Files

Date	23 March 2026
Team ID	SWTID-2026-1377
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA — No database used; JSON knowledge base is used for concept evaluation.
5	Environment configuration file (.env.example or similar)	NA — No environment variables or secrets required.
6	Deployed application URL (if hosted)	No — Application currently runs locally on the Flask development server.

7	APK / Executable binary (if applicable for mobile/desktop apps)	NA — Web application, not a mobile or desktop application.
8	Dockerfile / Containerization config (if applicable)	No — Containerization is not implemented in the current version.
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes (<i>If prepared; otherwise change to "No"</i>)

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Voice-Based-Concept-Understanding-Analyser/

```
|
|
|— app.py
|— nlp_engine.py
|— requirements.txt
|— README.md
|
|— knowledge_base/
|   |— concepts.json
|   |— keywords.json
|   └— expected_answers.json
|
|— templates/
|   |— index.html
|   |— about.html
|   |— analyze.html
|   |— result.html
|   └— base.html
|
|— static/
|   |— css/
|   |— js/
|   |— images/
|   └— audio/
|
|— reports/
|
|— test/
|
└— assets/
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://concept-checkmate.vercel.app/
Login Credentials (Demo)	Not Applicable (No authentication implemented)
Platform / Hosting Provider	vercel
Repository Link	https://github.com/sindhuradevi7-ux/Voice-Based-Concept-Understanding-Analyser
Demo Video Link	Not available

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites: Python 3.x, pip, Anaconda Navigator (recommended) or virtualenv

1. Clone the repository: `git clone https://github.com/sindhuradevi7-ux/Voice-Based-Concept-Understanding-Analyser.git`
2. Navigate to the project folder: `cd Voice-Based-Concept-Understanding-Analyser`
3. Create a virtual environment: `python -m venv venv`
4. Activate the virtual environment: `venv\Scripts\activate`
5. Install dependencies: `pip install -r requirements.txt`
6. Run the Flask application: `python app.py`
7. Open the application in your browser: <http://127.0.0.1:5000/>

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The application is deployed on Vercel, but advanced backend services and large-scale NLP processing may require a dedicated server for optimal performance	Future deployment using cloud services such as AWS, Azure, or Render with production-grade backend infrastructure.
2	User authentication, profile management, and learning history are not implemented.	Planned for future versions to enable personalized learning and progress tracking

3	The knowledge base contains predefined concepts and requires manual updates when introducing new topics.	Future enhancement includes a dynamic knowledge base with administrator support and automated updates.
